WISESTUDENT – CSR COMPLIANCE & SAFEGUARDS SUMMARY

Document Purpose

This document outlines the compliance framework, ethical safeguards, and implementation principles followed in the delivery of WiseStudent CSR-supported programs. It is intended for CSR reporting, audit reference, and governance assurance purposes.

1. Program Scope

WiseStudent delivers structured student readiness programs through schools under CSR-supported initiatives. These programs focus on building awareness around real-life decision-making, financial understanding, and handling everyday pressures in a safe, non-intrusive manner.

WiseStudent acts as the technology and implementation partner, while participating schools retain oversight of student engagement. CSR partners provide funding support and governance oversight.

2. Data Collection & Privacy Safeguards

WiseStudent follows a minimal and responsible data approach.

- No sensitive personal data is collected
- No biometric, medical, or health records are captured
- No financial transaction data of students is stored
- No personal identifiers are shared with CSR partners

All reporting is provided in aggregate and anonymised form. Individual student-level data is not displayed, analysed, or shared outside the school's administrative access.

3. Student Safety & Ethical Boundaries

The WiseStudent platform is designed with strict ethical boundaries suitable for student-focused programs.

- The platform does not provide counselling, therapy, or diagnosis
- No mental health labelling or psychological evaluation is performed
- No automated decision-making replaces human judgment
- Students are not scored, ranked, or categorised

The platform is intended solely for awareness and exposure, not assessment or intervention.

4. Program Delivery Safeguards

- Programs are delivered through schools in a school-controlled environment
- There is no academic disruption or curriculum interference
- Teachers are not required to conduct additional instruction
- Participation is structured and non-compulsory at the student level

WiseStudent does not engage in direct, unsupervised communication with students outside the school context.

5. Governance & Accountability

- WiseStudent is responsible for program implementation and reporting
- Schools maintain administrative oversight of student participation
- CSR partners review program scope, progress, and outcomes through reports and dashboards
- CSR partners do not engage in operational execution or individual-level monitoring

Clear separation of roles is maintained to ensure accountability and audit clarity.

6. Program Scope

WiseStudent does not process, store, or display CSR financial transactions within the platform.

- CSR funding is handled offline through formal invoicing and banking channels
- No payment information, budgets, or financial balances are shown on dashboards
- Financial records are maintained separately for audit purposes

This separation ensures that the platform remains focused on program delivery and impact.

7. Reporting & Audit Readiness

WiseStudent provides structured reports suitable for CSR and audit requirements, including:

- Impact Summary Reports
- School Coverage Reports
- This Compliance & Safeguards Summary

All reports are generated in line with ethical and governance standards appropriate for student-focused CSR initiatives.

8. Student Safety & Ethical Boundaries

To the best of our knowledge, WiseStudent CSR-supported programs are implemented responsibly, ethically, and in accordance with standards suitable for educational and student-focused initiatives. Safeguards are in place to protect student privacy, safety, and institutional integrity.
